

To register, visit tritechtraining.com or contact our Training Director Phil Sanfilippo at 800.438.7884 ext. 7800 or by email at phil@tritechusa.com.

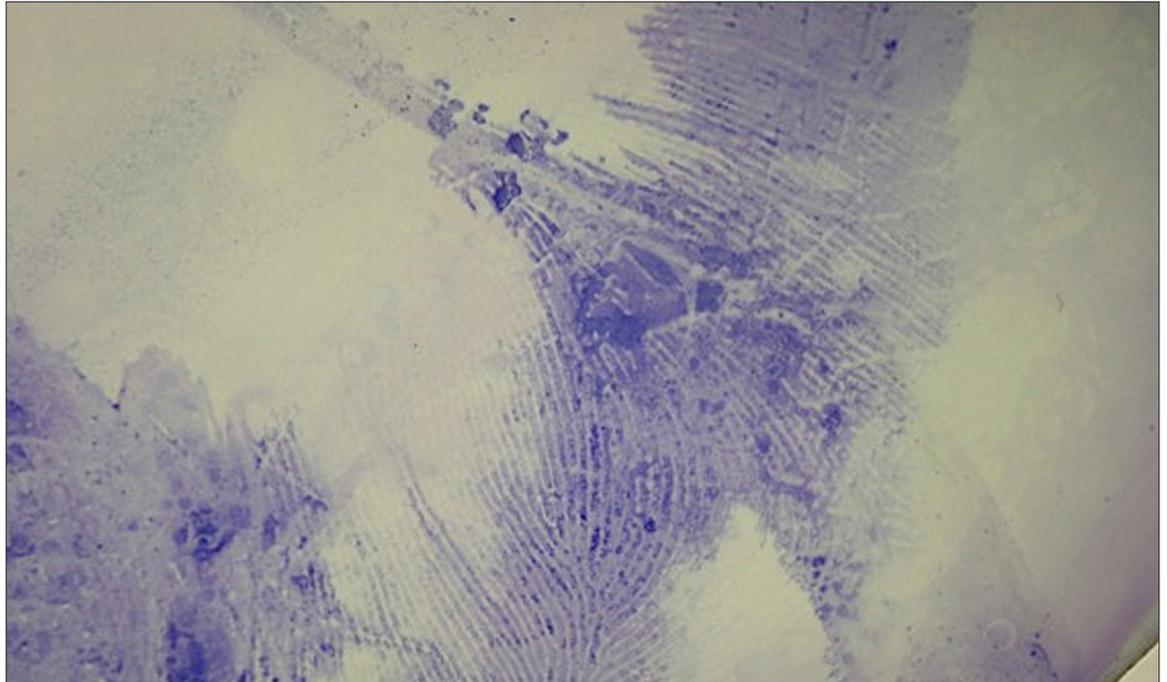

Courses are presented in partnership with the International Association for Identification.

ADA / Special Accommodations

To ensure we can accommodate persons with special needs who wish to attend our courses, please be sure to identify the accommodation needed when you register, or if applicable, at the time you register by phone.

Host a course

By hosting one of our courses, you will be providing your agency's personnel and the forensic professionals in your area with a high-quality training opportunity, right in your local area. This means less cost to you or your agency for expenses such as travel, lodging, and meals, and less time away from home and family. Plus, hosts can qualify for tuition savings. For more information, visit tritechtraining.com.

PROCESSING LATENT PRINTS ON BLOODY AND SPECIAL SURFACES

**Instructors: W. Morgan Hays, CLPE,
and Tom Hill**

February 26 - 28, 2018

Tuition: \$489

Course Location:

**Lawrenceville Police Department
300 Jackson Street, Lawrenceville, GA 30046**

Lodging Information:

**Hampton Inn, 1135 Lakes Parkway
Lawrenceville, GA 30043 | (770) 338-9600**

Room Rate: \$99 plus tax per night. Single/Double | Booking Info: Mention the Lawrenceville Police Department course when registering by telephone.

To register, visit tritechtraining.com or contact our Training Director Phil Sanfilippo at 800.438.7884 ext. 7800 or by email at phil@tritechusa.com.

ABOUT TRITECH

A leader in the forensics market, Tri-Tech Forensics provides evidence collection and crime scene investigation products and training to crime labs and crime scene investigators throughout the world. With over 30 years of experience, we are the nation's most proficient developer and manufacturer of forensic kits. We are committed to providing our customers with state-of-the-art forensics products and services at affordable prices. It is our goal, through our research and development program, to continue to develop superior products and training to aid in all aspects of crime scene investigation and crime lab analysis. We know how important our products and training are to the forensics community, from investigation to prosecution. Our mission is the same as our customers – *Identify. Protect. Preserve.*

COURSE DESCRIPTION

Processing Latent Prints on Bloody and Special Surfaces

This course includes comprehensive training in the chemical processing of latent print evidence found on bloody and difficult to process surfaces. One day will be spent learning to use photography as tool to document the evidence. Exercises that include specialized lighting techniques and use of forensic light sources to visualize and photographically record the evidence are included.

The processing, collection, and preservation of fingerprint evidence are primary concerns for those who have conducted crime scene investigations for the past 100 years. Many of the individuals who are currently charged with this responsibility have not had the opportunity to attend a course of instruction on the proper application of latent fingerprint processing techniques that are available to them.

This accelerated 24-hour course on the processing, recovery, and photography of latent print evidence has been designed for detectives, crime scene investigators, and fingerprint identification specialists. This course will provide both lecture and hands on techniques for processing latent prints on porous and non-porous surfaces, using both mechanical and chemical techniques.

The course will also introduce students to photographic and lighting techniques that are useful in the documentation of latent print evidence. Photography is essential in cases where prints cannot be otherwise collected, where processing techniques do not render permanent results, and in cases where processed evidence is not readily visible or discernable to the naked eye. Since this course presents techniques that include fluorescent fingerprint reagents, an overview of forensic light sources will be presented and students will have access to forensic light sources in order to visualize and photograph the evidence they process in class. Safety will be stressed in all exercises.

COURSE INSTRUCTORS

MORGAN HAYS

Morgan Hays is currently supervisor of the Florida Department of Law Enforcement (FDLE) Latent Print section at the Jacksonville Regional Operations Center. Morgan is a certified latent print examiner by the International Association for Identification (IAI). He is an active member of both the IAI and the Florida Division of the International Association for Identification (FDIAI). He has taught numerous colloquia and given lectures at FDIAI conferences, including "Biological Aspects of Friction Ridge Skin" and "Conflict Resolution and Verification." Morgan is also an ASCLD/LAB – International Certified Assessor for the American Society of Crime Laboratory Directors/Laboratory Accreditation Board. He has participated as a technical assessor of latent prints for ISO 17025 laboratory accreditation assessments from the municipal to the federal level.

TOM HILL

Tom Hill was employed with the City of Fort Lauderdale Police Department from 1973 to 2004, working first in the Patrol Division, Detective Bureau, and then in the Crime Scene Investigation Unit in the 1980s. He investigated all deaths, aggravated batteries, sexual batteries, child abuse, and traffic homicides. From 2005 to 2016 he worked with the Broward County Sheriff's Office in the CSI Unit in a civilian capacity. There he was responsible for all digital imaging evidence, training new Crime Scene Detectives in Bloodstain Pattern Analysis, Crime Scene Photography, and the chemical processing of blood scenes and evidence. He was also a Footwear Pattern Analyst and did comparisons for agencies throughout South Florida. An Army veteran, Hill has a degree in Criminal Justice from St. Thomas University (Biscayne College 1981).
